CLAIMS INFANTILE PARALYSIS PREVENTATIVE — Two
years of research work by Dr.
Charles Armstrong, government
medical acientist at Washington,
ends with the development of
what he claims is a preventative
for infantile paralysis. The preventative is a spray made of two
simple ingredients, pieric acid and
a pinch of common table salt in
solution. Dr. Armstrong asserts
that this mixture has the effect of
making the mucous membranes of
the nose impenetrable to the
dreaded germs.

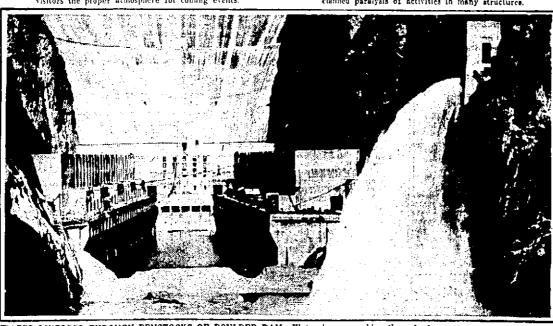

ICE FLOES ARE PILED AS HIGH AS ROOFS—Flood warnings were sent out along the Susquehanna and Juniata rivers in Pennsylvania as the ice gorge at the mouth of the Juniata near Harrisburg caused the streams to overflow their banks. This view is looking toward the mouth of the Juniata, showing ice floes piled as high as roofs on nearby property. Clark's ferry bridge can be seen at extrema left and the Susquehanna river in the right background.

EVEN PUP GETS CENTENNIAL SPIRIT—Even the pups get into the spirit of the coming Texas Centennial exposition, which will begin on June 6 in Dallas. For example, Bozette, seven-week-old Boston terrier, shown here, uses a 10-gallon hat for a kennel to give visitors the proper atmosphere for coming events.

STRIKE LEADER STUDIES HIS MANEUVERS—James J. Bambrick, leader of the Building Service Employes' union in New York, plots strike activities in the metropolis on a map in his office. He claimed paralysis of activities in many structures.

WATER DIVERTED THROUGH PENSTOCKS OF BOULDER DAM-Water is seen gushing through the penstocks of Boulder dam, another development in the completion of this massive structure. This stream is issuing from one of six outlets on Arisons canyon wall.

MEXICAN STRIKERS TREK 300 MILES FOR HEARING—This caravan of strikers walked 300 miles from Guanajuato to Mexico City to demand better working conditions at mines. On their shoulders, many of the strikers carried signs, which later were unfurled in the streets of the capital. The signs urged that the executives of the company involved should be ejected from Mexico.

HOTEL MAIDS AID STRIKING WORKERS.—Maids of an apartment hotel in New York are seen on picket duty, alding building service employes who went on strike, parelyzing activities in akyscrapare.

SPAIN'S POLITICAL PRISONERS FREE MEN ONCE MORE—In prison attire, with prison hairent still apparent, these men join happy paraders through the atrests of Madrid, following decree of amnosty to 20,000 political prisoners. The decree was issued immediately on the liberal government's accession.

HEFTY "CHORUS GIRLS"—What occurs when three chorus girls spend a night in a Harvard dormitory is the subject of a new musical comedy presented by an exclusive undergraduate society at Harvard university. The girls are portrayed by, left to right, William A. Kellogg of Weston, Mass.; Hunt Greening of Puerte Rico; John Benton of Belmont, Mass.; Joseph P. Kennedy, Jr., of New York; Thomas Biledeau of Durchester, Mass., and Robert Eichler of Washintown, Com.

President Roosevelt gains statute in his contest for the presidency by climbing through the ropes into the Ohio arena The state thereby to made a pre-conven tion testing ground of the new deal. Col Henry Pirickinglige of New York Demo cratic critic of the Russevell administra tion will give the President's party oppon ents in opportunity to express themselves by electing delegates pledged to him-

Champions who won't fight can't expect to he popular Some of Mr Rocenvelt's adviners would prefer to play safe and keep their man under wraps until he no longer can avoid a contest. They are afraid something might happen to injure his chances in the convention next June But Mr Poorivelt who knows his chances next Juno nic extremely favorable is willing to try them out in Oblu in the preferential primary next May
Oblo rather likes its distinction as a

plyotal state in politics as well as almost everything else. It is flattering to know that President Leosevelt and his opponents and also the contending factions in the Republican party are willing to let Onlo voters make or break their chances Ob viously the state must enloy a reputation for a well balanced political viewpoint-a reputation which couldn't have been devolumed without balance in the factors which affect a political viewpoint taluly if politicians are willing to trust the states tudement Obtoans see willing to proposate by doing their level best to

the Columbia Broadcasting Systems tolic, of spunsoring discussion of public problems by all political parties subject to its own cultorial discretion is an intere-ting and important experiment in the application of the abstract theory of froc apecch

On Thursday night Earl Browder secto tary of the Communist party of the United States directed an appeal to farmers and laborers to unite in a third political party Displessions of indignation accompanied and followed the incident Pickets of the Nutional Americanization league paraded during the speech

There are many patriots who sincerely belleve communists do not have a right to be heard even when using their own pires or spraking directly to audiences et many of the same patriots also profess belief in the principle of free speech Ob viously they cannot hold both beliefs at the same time without being thoroughly Inconstatent

Loriunately their extremism is held in check by the moderation of other perhaps equally good patriots who though disagree ing with the dectrine of communism he lies that if free speech means anything it means freedom to speak These latter patriots seem willing to take their chances with the doctrine of communism in the open in preference to driving it underground by persecution. Possibly they are wrone but if they're wrong than free speech would acem to be wrong also

The Last Time.

Whether or not Prosident Roosevella proposal for a confiscatory tax on ur dded corporate earnings is accepted by congress in whole or in part it is bound to have one definite affect. Big business men and a good many of their little broth ere aren't going to give the President the benefit of the doubt any more they have given him plenty of chances

to show that he wants to play the game their way A couple of times they almost have been ready to make him a member of the team. But each time when it came to a pinch Mr Roosevelt has been caucht trying to titp them. They are convinced now that he wants to be an outsider

The strange part of it is that just be fore the President made his latest nofriendly gesture he was being praised for carrying out his promise to give business a breathing spell. It even seemed likely he was going to be able to persuade busi ness men that he wasn't such a bad fellow ofter all at least until the elections wors over

For some reason or other he chose to stick out his foot to trip the corporations just when they were getting tendy to case up on him. No doubt he knew what he was doing, but this linic it has been set tled once and for all that he doesn't want friendship from the boys whose feelings he has hurt once too often. From now on he may expect to be treated as a marked man when he crosses the tracks into their district.

If Mr Horking h not a pulble then someone must be responsible. Covernment without responsibility is letter cable. Who is responsible for the it of dumb poll ticians who try to over a work relief em ployes into making ; litted outributions?

To that quation there can be only one inswer. The United States operates under a system of party keyeinment. The party in power is therefore responsible for the performance of the duties undertaken during its administration. Work relief is one of those duties

The opposition party naturally expects to capitalize the defections of the party in nower That is a fundam atal process lh party government which provides voters a guarantee that no single pollical group will be able to perpetrate important

Administration of relief is admittedly one of the hurdest fasks over undertaken by any administration in American his tors. As a malter of fact anybody who here is Browder's speech could have observed that had the same ulterance with just one or two minor changes here and here been given by Secretary ickes or Dr one or two minor changes here and here here given by Secretary lekes or Dr Fugw II it would have been exactly in time with the speeches that have been made on the radio by our product new dealers for the last year and a hill brother it was a good thing to he here the Prowder speech broade at the aute the

the Prowder speech broadcist be auce the new deal partys argument might sell to that there now is no need for communism since the new deal or a striught with the main lierns enumerated by the Communist party spotesm.

From the viewpoint of the opponents of the new deal it was a good thing to have the Communist leader speak his I trine the communist leader speak his I trine the communist leader speak his I trine the second of the new for the communistic leader speak his I trine the second of the communistic leader speak his I trine the second of the community leader to the com

In favor of equal rights for Negroes 8. In favor of the youth bill worked out by the American voith congress.

There were in Mr Browder's speech gaingraphs that rend almost identically with arguments made by prominent new ienters recently thus Mr Browder said. When you here the blood and thunder demandations of the Communists remember that the same accusations were made activated the struckly.

ngainst Lincoln when he led the struggle-ngainst chaff I savery. The new dest injurient has been that President Roosevelt like Lincoln la st-

President Rosesselt like Lincon is still needed for emanch thing the people from sharer except that it is economic emancipation now rather than freedom for a particular racial group.

The principal inconsistency in Mr Browders erecen is that after denomicing the formal states of the building that Welling and the states of the building that Welling is the states of the building that well in the building that the building the building that the building the building the building that the building that the building the b Conneial interests he insists that trankin D hoosevelt which will come amended the strengthened its rule under trankin D hoosevelt which will come amended as a surprise to Chairman and of the securities and exchange on the securities and exchange the nearest point that Mr Browder and the behavior to the second before the second belong to the second belong the second belong to the second belong the second belon

The nearest point that Mr Browder ame to hinting at some kind of revolutionary face to accompilish Communist ide was in the following sentences such a Farmer Labor party would not quite that we all agree on a complete program. It would not vet take up the '4 Lingram of socialism of revolution for which make are not vet prepared. It would pledge itself to carry out only those few stimply measures which millions of need to the Aready according to people are a rendy agreed upon.
Then there was another paragraph

When we have the support of the majority of the tolling people we will put that program into eff. t with the same that program into effect with the same firmines, the same determination with which Wa hincon and the founding fathers carried through the revolution that established our country with the same thoroughness with which Lincoln abollahed chattal slaver. We say most seriously that within two months after a majority gives power to the Communist program we can completely abollsh poverty.

There has been new deal speakers like Dr. Turwel who in addressing groups composed fargels of the members of the lad Poverty In California. Movement spoke of the necessity of avoiding possible resolution in the count that the new deal program was functated Dr. Tugwell also spoke of the importance of doing away with stelle monitive of individual ism declaring all who disagreed to be torles autocrits and enemias and finally he made this appeal.

And we should succeed for once in retablishing a farmer worker alliance in this country which will carry all before it which will reduce our laboratore on half-way measures and illow us to carry through these reconstructive ones both in agriculture and in high tractice and in the tractice of the prosperous. Dr. Tugwell also said the coming campugin was important because it may well determine whether some legas from non-

pugn was important because it may well determine whether some years from now determine whether some years from now we shall do as other nations have—throw over completely the democratic and evalutionary process or whether we shall find then that our teaderstip our administration and our discipline have been equal to the tysik of creating institutions suited to the world in which they are expected to operate.
